### THE PROJECT IN COVID TIMES

The global covid crisis that we have suffered this year affects everyone. The EduZWaCE project is also influenced by necessary measures and restrictions introduced by several governments. Nevertheless, the project partners put their efforts to successfully finalize the project and achieve its objectives even in these difficult times.

The remaining two project meetings were moved to a virtual space; they were held 26th June and 30th September. The partners discussed updates of the intellectual outputs, pilot trainings and national workshops, as well as management and financial issues of the project.

### NATIONAL WORKSHOPS

The final project results and outputs were disseminated, among other communication channels, through the second round of national workshops, which took place in September (mostly in an online form), and were attended by a total of more than 120 participants.

They appreciated the presented intellectual outputs, including the Knowledge Hub, the Training Course, the Diagnosis Tool, and the overall Online Platform, and evaluated them as useful and user-friendly tools.

### INTELLECTUAL OUTPUTS

#### ONLINE TRAINING COURSE

The online training courses EduZWaCE Manager and EduZWaCE Worker are now available in both English and all partners' languages (in total 10). Each course is composed of 5 learning units consisting of an introductory video, related training material, audio-visual materials and the final assessment procedure (quiz).

During June and July, pilot trainings were organized in Greece, Slovenia, Romania and Austria. Over 70 participants were trained and the course content was finalized according to their suggestions.

Check the Online EduZWaCE Course at: [lms.eduzwace.eu](http://lms.eduzwace.eu).

#### KNOWLEDGE HUB

After its final update, the Knowledge Hub – an interactive resource centre on the topic of zero waste and circular economy – now consist of 219 resources. They include mostly scientific and “grey” literature, (hand)books and reports but also several other types of resources in English and partners' languages. The Knowledge Hub represents the recent level of knowledge in the field with majority of resources published in last three years, including 29 newest resources from 2020.

Check the online version at: [khub.eduzwace.eu](http://khub.eduzwace.eu).

#### DIAGNOSIS TOOL

The Diagnosis Tool is a self-assessment tool for companies (in particular SMEs) that helps them to investigate opportunities for circular economy and zero waste solutions. It assesses both the physical level (products, production processes) and the governance level (business strategy, stakeholder relations and status of collaboration) of a company.

It is finally available in English and all partners' languages, and the user can choose either to perform the evaluation online, or to download the offline version (in Excel) and complete the evaluation on his/her computer.

Both versions of the Diagnosis Tool are available at: [diagnosis.eduzwace.eu](http://diagnosis.eduzwace.eu).

All project outputs will stay available at the **EDUZWACE ONLINE PLATFORM – [eduzwace.eu](http://eduzwace.eu)** that you are kindly invited to use. You can explore the Knowledge Hub, experiment the Diagnosis Tool and contact with your peers through the Collaborative Section, as well as attend the Online Training Course (for the latter, please contact your national EduZWaCE coordinator).
